

Alice's zone: $P = P_{\max}$

1 hour

$$c_{\text{abs}} = c_{\text{max}}$$

100 units

Alice's ruler: 100 local units

Alice

Bob's zone: $P = P_{\max}/2$

$\frac{1}{2}$ hour

$$c_{\text{abs}} = c_{\text{max}}/2$$

50 units

Bob's ruler: 100 local units

Bob

Both measure $c_{\text{local}} = 100$ units/hour. The asymmetry is observable only in cross-zone comparison.
